## Activity Sheet

## League Table Statistics

Objective: To be able to solve problems from a table and to use information to create a bar chart.

| Team Name | Won | Drawn | Lost | Points |
| :---: | :---: | :---: | :---: | :---: |
| Swindon | 6 |  | 3 | 19 |
| Bristol Rovers | 5 | 2 | 3 |  |
| Oxford | 2 | 4 |  |  |
| Sunderland |  | 2 | 2 | 20 |
| Portsmouth | 4 | 3 | 3 |  |

a) Complete the table above - teams get 3 points for a win, 1 for a draw and 0 for a loss. Each team has played 10 matches.
b) Which team has the most points?
c) What is the range between the highest number of points and lowest number of points?
d) Using the template below, draw a bar chart to show the number of wins each team has.
